

☑ CHECKLIST FOR GYM/EXERCISE FACILITY PATRONS Page 1 of 1

The following are the minimum recommended health protocols for all patrons of gyms or other exercise facilities and classes, whether indoor, outdoor, individual, or group, in Texas. These minimum health protocols are not a limit on the health protocols that individuals may adopt. Individuals are encouraged to adopt additional protocols consistent with their specific needs and circumstances to help protect the health and safety of all Texans.

The virus that causes COVID-19 can be spread to others by infected persons who have few or no symptoms. Even if an infected person is only mildly ill, the people they spread it to may become seriously ill or even die, especially if that person is 65 or older with pre-existing health conditions that place them at higher risk. Because of the hidden nature of this threat, everyone should rigorously follow the practices specified in these protocols, all of which facilitate a safe and measured reopening of Texas. The virus that causes COVID-19 is still circulating in our communities. We should continue to observe practices that protect everyone, including those who are most vulnerable.

Please note, public health guidance cannot anticipate every unique situation. Individuals should stay informed and take actions based on common sense and wise judgment that will protect health and support economic revitalization.

Health protocols for individuals:

- ☐ Maintain at least 6 feet separation from other individuals not within the same household. If such distancing is not feasible, other measures such as face covering, hand hygiene, cough etiquette, cleanliness, and sanitation should be rigorously practiced.
☐ Self-screen before going into a gym or exercise facility or class for any of the following new or worsening signs or symptoms of possible COVID-19:
☐ Cough ☐ Sore throat
☐ Shortness of breath or difficulty breathing ☐ Loss of taste or smell
☐ Chills ☐ Diarrhea
☐ Repeated shaking with chills ☐ Feeling feverish or a measured temperature greater than or equal to 100.0 degrees Fahrenheit
☐ Muscle pain ☐ Known close contact with a person who is lab confirmed to have COVID-19
☐ Headache
☐ Disinfect any equipment before and after use, including exercise machines and dead weights.
☐ Wash or disinfect hands upon entering a gym or exercise facility or class and after any interaction with employees, other customers, or items in the gym or exercise facility.
☐ Wear gloves that fully cover from the wrist to the fingers while exercising.
☐ To the extent a patron brings their own equipment to the gym or exercise facility, the patron should disinfect the equipment before and after use.
☐ Consistent with the actions taken by many individuals across the state, consider wearing cloth face coverings (over the nose and mouth) when entering a gym or exercise facility or class, or when within 6 feet of another person who is not a member of the individual's household. If available, individuals should consider wearing non-medical grade face masks.
☐ Individuals aged 65 or older are at a higher risk of COVID-19. To the extent possible, avoid contact within 6 feet with individuals aged 65 and older. Individuals aged 65 and older should stay at home as much as possible.
